IORDANIS KAVATHATZOPOULOS

Iordanis Kavathatzopoulos is Professor of Human-Computer Interaction at the Department of Information Technology, University of Uppsala, Sweden. He obtained his PhD in Psychology and is Docent of Psychology. He has worked as Associate Professor of Psychology at the Department of Psychology of the University of Uppsala. He has also been Visiting Professor at Florida International University, USA, University of Tsukuba, Japan and other.

His research interests cover a wide range of fields between Philosophy, Psychology and New Technologies. They focus on the areas of Measuring and Training Ethical Skills, Ethics of Business, Organizations and Politics, Ethics of Modern Technologies, Ethics of Usability of Technological Systems, and Ethics of Autonomous Systems and AI.

Professor Kavathatzopoulos has developed special tools for measuring problem-solving and decision-making skills as well as training programs to support ethical competence. Leaders of business, governmental and other organizations are trained using these methods. Private companies and government agencies use these tools to support decision-making, map organizational ethics needs, and measure the ethical competence of their personnel.

He is a member of the editorial board of many scientific journals, a member of the scientific committees of the main conferences in the area of his research, the founder of the Center for Ethics, Sustainability and Technology of Uppsala University, and a member of boards of international scientific and academic institutions.
